Cathy, part of this is the discharge limits have not been established. So, I think the SNC may still apply. Part of that decision is on the EMWMF portion of the FFS. The 4<sup>th</sup> FYR demonstrated non-compliance due to exceedances. T

So, until we agree to the discharges, DOE has not meet the compliance issue. What are your thought, since DOE is still discharging waste water according to DOE Orders?

No. Not in SNC is still the correct status.

For Oak Ridge, the administrator issued a decision on a formal dispute (12/31/20 and 1/19/21). The DOE is now setting out to implement the decision. DOE is not in "substantial non-compliance" – I guess if they fail to comply with the decision they may get to SNC, but at this point, no, they are not in SNC.

Cathy – would the info below change the compliance status for Oak Ridge to something other than "Not in SNC"?

Charlotte, FYI.

I just noticed that the formal dispute (initiation) is not in SEMS. I have the decision + the separate ARARs that need to be added. I will try to add under OU 00. I hope I don't have issues since these are two separate documents. I will try to combine before adding to SEMS.

Thanks
